PROFESSIONAL EXPERIENCE

2023–2024 — **Datamatics Global Services Limited**
INDIA · Bangalore
Facilitated on-field lead generation for managers and sales officers with the IDFC FIRST BANK - SO APP, streamlining attendance tracking and leave management for enhanced operational efficiency.

2021–2022 — **Nascencer Technolgy Pvt Ltd**
INDIA · Jaipur
Led the development of the Artiner e-commerce platform using Laravel, empowering artists to showcase, promote, and sell their artworks via www.artiner.com. The mobile application facilitating recruitment services through www.chowkti.com utilizes a robust back-end framework combining Laravel for its PHP-based services and Node.js for its JavaScript-based services, ensuring a scalable and efficient solution

2016–2018 — **PeopleOne Technology Pvt Ltd**
INDIA · Chennai
At Expertus/PeopleOne, I focused on enhancing the ExpertusONE Learning Management System (LMS) by developing two major features: interactive content creation using open sources to enrich online learning experiences, and enabling seamless transfer of reporting subordinates between registrations for admin/managers. Additionally, I contributed to resolving critical bugs in ecommerce and addressing customer-reported issues, ensuring the reliability and effectiveness of the ExpertusONE LMS product.

2013–2016 — **Farshore Software Development Pvt Ltd**
INDIA · Madurai
During my tenure at Farshore Software Development Pvt Ltd, I played a key role in developing two significant projects. Firstly, I implemented a streamlined leave application system, enhancing user experience by utilizing WordPress, jQuery, Mailchimp, and MySQL. Additionally, I led the development of Tippity, a weather-based fashion app, creating API modules for seamless integration using CakePHP, HTML, CSS, and MySQL. These experiences underscore my proficiency in various technologies and my ability to lead backend and web application teams effectively.
